

<https://getbootstrap.com/>

Bootstrap - The most popular HTML, CSS, and JavaScript framework for developing responsive, mobile first projects on the web.

# Build fast, responsive sites with Bootstrap

Quickly design and customize responsive mobile-first sites with Bootstrap, the world's most popular front-end open source toolkit, featuring Sass variables and mixins, responsive grid system, extensive prebuilt components, and powerful JavaScript plugins.

### Compiled CSS and JS

Download ready-to-use compiled code for **Bootstrap v4.5.2** to easily drop into your project, which includes:

- Compiled and minified CSS bundles (see [CSS files comparison](#))
- Compiled and minified JavaScript plugins

This doesn't include documentation, source files, or any optional JavaScript dependencies (jQuery and Popper.js).

[Download](#)

### Source files

Compile Bootstrap with your own asset pipeline by downloading our source Sass, JavaScript, and documentation files. This option requires some additional tooling:

- Sass compiler (Libsass or Ruby Sass is supported) for compiling your CSS.
- [Autoprefixer](#) for CSS vendor prefixing

Se copian y pegan los archivos en la carpeta “css” del proyecto:

Se copian y pegan los archivos en la carpeta “js” del proyecto:

Al abrir el proyecto en el Visual Studio Code, en la carpeta “css” aparecerán los archivos de Bootstrap, se debe crear un archivo “.html” y enlazarlo con “bootstrap.css” para utilizar los estilos:
